

LA-220

QUICK START GUIDE

EXTEND YOUR WARRANTY FREE!

Your new LA-220 comes with a 1 year warranty. Want to double it? Register your new microphone within 30 days of purchase at: LautenAudio.com/Register

CAPSULE

32mm custom-crafted, hand-tuned transducer designed explicitly for modern recording.

NOTE: Use a pop filter for vocal recording to protect the capsule from moisture and debris.

LOW-FREQUENCY SOUND SHAPING

The flat setting allows the full low-frequency extension of a sound to be captured.

The 120Hz setting reduces low frequencies and mud while increasing clarity.

+48V

PHANTOM POWER

Your LA-220 requires 48 Volts of Phantom Power to work.

SPL & DYNAMIC RANGE

Your LA-220 is able to withstand up to 130dB of SPL and provides 120dB+ of dynamic range to ensure optimal performance on any sound source.

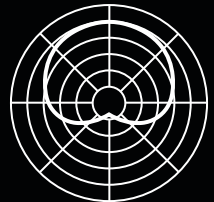

HIGH-FREQUENCY SOUND SHAPING

The flat setting is modern and bright, but never harsh.

The 12kHz setting is classy and warm, like a vintage microphone.

CARDIOID
